

WHAT OUR CUSTOMERS ARE SAYING

"Manageourclub.com has been instrumental in improving communications with our club. As Director of Coaching it's imperative that I can communicate with my club easily and quickly and this website allows me to do this. I look forward to continuing our relationship with manageourclub.com"

Simon Brinklow - BTSC Director Of Coaching

"Using ManageOurClub.com, we were able to combine our member database, email client, registration process and website all into one site that does it all. Our site is very easy to maintain and customize. It has saved us hours of effort with our previous systems."

Kristen C - Bartlett Hawks Youth Football

NEED A FEATURE...JUST ASK

At ManageOurClub.com we realize that no one knows your needs better than you. We strive to provide features that simplify the job of running a sports organization. If you have an idea for a feature, just ask. We are always looking to add features that enhance our service.

IMPROVE COMMUNICATIONS

Email can be sent to groups, teams, leagues, and individuals from the site. All email sent from the site is logged. When email is sent BCC (blind copy) is used so that personal email address remain confidential.

Email teams and groups with one click

Club, league, and team based **news items** can be created. They are displayed on the appropriate pages on the site and can also be emailed. News items can have a start and end date, appearing on the start date and disappearing after the end date.

ONLINE REGISTRATION

For a travel soccer club the **tryout process** is made up of phases: register for tryouts, tryouts, post tryout results, player accept/decline, registration. Each phase is tracked on a single page where parents can view the status of all their players. Many of the phases can be customized to meet your specific needs.

The site can allow users to register for **programs**. A program is any event that you want people to sign-up for (an example is a Speed and Agility camp). You can customize the registration form and track registrants.

You can accept **online payment** (via credit card) for tryouts and program registrations. Note that online payment requires a merchant account which you set up at your bank or other provider.

Supports online payments via credit card

MANAGE CLUB DATA

Unlimited **Seasons, Leagues, and Teams**. ManageOurClub.com allows you to set up your teams to match your organization's structure.

Coaches, Parents, and Players or any person involved in the club has a profile on the website. Family associations are stored. Every profile can have a username and password. Only one username and password per person is required for the site.

Only one username and password per person

Fields can be managed including directions and a map. Field status can be set so you can communicate field availability quickly.

Games and Schedules can be managed by the coaches/managers or by the club. For soccer clubs, IWSL and NISL games can be retrieved from the league sites and posted automatically to the team schedules. Scores and stats can be kept by coaches/managers. The site can send automatic game/schedule reminders to parents and players.

Groups can be created and members added. Groups can have their own page showing a list of members and other information.

Every team has a **team page**. This page contains contact info, news, a schedule, and for logged in users that are a coach or parent, a roster.

Every team has its own page

Other info that can be shown on the site include: photos, links, sponsors, weather, and much more.

SECURITY

At ManageOurClub.com we take **data security** seriously. We use secure-socket layer (SSL) certificates to encrypt data transmitted to the site. The host server is in a secure data center that is monitored 24/7/365. Hosting is provided by VERIO, one of the premier web hosting companies. Data is backed up constantly and can be restored quickly in case of unintended data loss.

Data is backed up constantly.

Site Pages are designed such that youth data is not shown to the general public. Personal information for adults can be displayed but in general what is shown and who can view it is set by the individual users. Updates to the site require password access. All updates are logged so if data changes on the site you can easily determine who made the change and when.

SUPPORT

Help is available through email or by phone. Email is preferred with responses sent within 2 hours during business hours. The site has a built in trouble reporting system where you can enter site issues and track progress.
